PRO SAVE

AUTOMATICALLY SAVES
50% ELECTRICITY FROM THE
MOMENT YOU SWITCH ON!

With energy prices soaring and fossil fuels being depleted everyone needs to do their bit to cut energy consumption. This is why at Numatic International we offer a range of energy saving vacuum cleaners.

Numatics AutoSave technology is a clever energy saving feature incorporated within their vacuums that ensures that energy is not wasted.

When the vacuum is turned on the AutoSave feature powers the vacuum up at 50% power.

When running in AutoSave mode the vacuum is powerful enough for most cleaning duties.

When more power is needed you can simply press a button on the vacuum and power is increased to 100%.

This allows the vacuum to cope with heavy duty cleaning requirements.

AutoSave technology ensures you only use the extra power when you need it, thus saving you energy and money.

HEPA-FLO

...not just better - Brilliant!

What is a HEPA filter and do I need one?

HEPA is an acronym for high efficiency particulate air . Basically HEPA is a type of filter that can trap a large amount of very small particles that other vacuum cleaners would simply recirculate back into the air. There are a couple of different categories of HEPA filters that can make understanding the abilities of your filter confusing.

Comparison of 2 layer paper and HepaFlo filtration efficiency.

Why Buy a HEPA Filter?

HEPA filters trap small particles that may cause problems for allergy sufferers and others with health problems.

Reducing or eliminating those particles will make cleaner air for the people of your home and work.

Models They Fit?

Numatic Cleancare;

Dustcare & Cleanroom

DUSTCARE

Fine Dust Care for the Workplace

- 100% Upgrade in Airflow Performance.
- Designed to operate where much larger dust generation is present.
- It is designed to connect directly to the dust collection hood on the particular hand tool being used.
- It will perform with both fine and high volume dust control at source.
- It allows for both clean operation and simplified emptying of the collected dust.

HEPA HIGH EFFICIENCY

High Efficiency & Cleanroom Machines

- Hepa H14 Numatic fully approved. Your guarantee of performance.
- Hepafilter model achieving an exceptional H14 99.997% standard down to 0.3 micron particle size.
- Compact in size, efficient in performance.

CLEANROOM

- This is cleaner than clean.
- This filtration standard achieving performance of 100% down to a particle size of 0.1UM.
- Cleanroom class 100 standard.

Advanced Filtration HZDQ-750

The 750 series of "H" specification machines has been specifically designed to meet the requirements of industries where it is necessary to remove dust that could constitute a health hazard and, as such, the total design concept has been to provide a choice of machines that meet an absolute 99.97% filtration efficiency, complete with practical engineering features that ensure that they can be easily and efficiently used and maintained on a day to day basis.

The HEPA filter units are securely mounted on their steel module with separate primary pre-filter mounted within the main container and the machines are designed to use our giant Microflo' dust bags to ensure easy, clean and safe emptying.

By design the complete assembly can be removed from its chassis, by a single toggle action, as may be required, in some instances, for decontamination purposes.

All machines are supplied with comprehensive accessory kits.

It is important that in applications where HZ machines are used that full consideration is given to the procedure of use, the appropriate clothing and protection that may be required by the operator.

CORDLESS CLEANING

BATTERY UNITS

The NBV190 has the classic Numatic styling and quality, incorporating our specially designed 36V lithium polymer battery pack, providing excellent performance and total freedom of operation.

NBV190 is available with two battery packs, dedicated universal charger set and full accessory kit.

RSB140 The tremendous advantage of a cordless RucSac vacuum cleaner will be more than obvious, NO CABLE, allowing it to be used in numerous difficult situations with exceptional results, climbing ladders, stairways, congested areas, busy pedestrian zones, cleaning aircraft, busses, even cinemas.

An integrated hand control module is incorporated to allow both instant on/off operation to save maximum power whilst incorporating a battery condition module to allow you to monitor battery reserve as you work.

Battery Vacuum Cleaners

DO'S

- Use only Numatic batteries and chargers.
- Charge batteries before use.
- Store batteries out of reach of children.
- Protect batteries and chargers from liquid / fluid.
- Protect from direct sunlight, heat and open flames.
- Keep batteries away from metal objects.
- Store batteries separate when not in use.

DON'TS

- Charge or use defective, damaged or deformed batteries.
- Open, damage or drop batteries.
- Expose batteries to high temperatures or direct sunlight.

Story about the Combi's

GENERAL FEATURES & BENEFITS

- Structofoam design.
- Ergonomically designed.
- Rugged in construction.
- The unique filter system enables the user to switch from dry to wet pick up without the hassle of changing filters or kits.
- Nucable replaceable plugged mains cable system.
- High efficiency dual washable filter system.
- Cyclonic Wet & Dry system.
- Unique 900 built-in tip empty system.
- Safety knot and ball float shut-off system.
